The Digital inclusion project is proceeding in the right direction in order to achieve its main objective: to improve, through the exchange of good practices, the skills of the personnel of the organizations involved in adult education, in the field of digital literacy, in particular for some target groups of the most disadvantaged in the labour market and more exposed to social exclusion, such as immigrants and the unemployed.

The partnership is achieving results also in terms of fixed intangible results. The Evaluation, Monitoring and Quality activities set out in the GANNT show that increases in the knowledge and skills of the organizations involved and their staff are emerging and stakeholders, on the main issues of the project, such as:

- Active citizenship,
- Methodological approaches to adult learning,
- Non-formal method in adult education and training,
- Social communication methodology for integration,
- Digital education and community building.

The project implementation activities carried out have been:
- sharing a brief presentation of partner organizations and cities;
- Promotion of mutual, direct and collaborative knowledge between partners, in order to create a "good working atmosphere" and always keep the staff's morale high;
- Construction of the mailing list and the WhatsApp group, to contribute to a rapid and effective communication between the staff of the partners;
- Construction of the logo and graphic layout;
- Construction and updating of the website and Facebook page;
- Participation in local events to spread and raise awareness of the project at a wider audience
- Collection and analysis of good practices (presented and shared among the partners during the II meeting in Cyprus);
- Meetings with migrants and the unemployed to detect emerging needs collect data and share good practices within the organization and during local meetings (involving internal staff, migrants and the unemployed).
- Collection of feedback from stakeholders already active in the field of integration for migrants and unemployed.

The activities and outputs planned for the dissemination so far have been:
- Multimedia materials (presentations of preliminary research and analysed good practices), photos and video.
- Brochure in all partner languages;
- Contacts with media functional to dissemination.
The third international meeting of the "Digital Inclusion" project was hosted by SIHTASUTUS NOORED TEADUSES JA ETTEVOTLUSE; it took place, as planned in Tallinn in April 2019.

A member of each partner organization participated in the meeting, with the exception of the English partner KBM Consultants, who was absent due to other international commitments, but who nevertheless sent a presentation in ppt. to show the progress of his work in Digital Inclusion.

The activities of the meeting were:
- in-depth information related to the dissemination plan,
- presentation of the draft "Best practice handbook",
- analysis of times and processes for handbook translation in the language of the country of each partner,
- updates of web pages dedicated to the project,
- summary of the workplan and upcoming deadlines set in the project's Time Table.

During the meeting the partners had the opportunity to deepen and exchange opinions on the good practices that will be included in the handbook, so as to also evaluate their applicability at a transnational level.

The fourth international meeting of the "Digital Inclusion" project was hosted by KBM Consulting and was held in London in April 2019, as planned. One member from each partner organization participated in the meeting, except for the Turkish partner, who was absent due to other commitments abroad. To compensate the absence, a web conference with the contact person was organized, in which the topics set as the meeting agenda were discussed. The focus of the fourth meeting was the Dissemination Plan, which was monitored and updated. In particular, each partner illustrated the types and quantities of stakeholders at the local level to which the material produced for dissemination was sent. Each partner also reported on the feedback received from organizations involved in the dissemination. Finally, the timing of the translation of the translation project results into the languages of the participating countries was also discussed.

The fifth and last international meeting of the "Digital Inclusion" project was hosted by KIRSEHIR KULTUR SANAT CEVRE KORUMA DERNEGI and was held, as planned in Kirsehir (Turkey) in September 2019.

During the meeting, each partner presented a report on the dissemination activities realized in his country. In addition, materials, information and functional documentation were collected for the Beneficiary Report. Each partner planned small events at the local level, in order to present final results of the project. Finally, the partners carried out a feasibility analysis of future projects based on the results achieved.
Digital Inclusion project is having positive effects on the three categories of beneficiaries involved:
- staff involved in the actions;
- organizations that make up the partnership;
- identified stakeholders in different countries.

In summary, the positive effects that the project is having on the staff involved are:
- improvement of knowledge and skills on integration through social learning and digital, through the study and analysis of good practices;
- enhancing skills on innovative methodologies and approaches for adult learning;
- acquisition of new key competences for educators who deal with adults;
- expansion of intercultural competences and the ability to establish relationships with people of others Countries.
- experimentation of peer learning thanks to the different and different staff profiles directly involved in the action.

The organizations involved in the partnership are acquiring new skills and are enhancing their action in the field thanks to the knowledge and the application of what is innovative and positive has already been done in other countries on the subject of integration through social and digital learning. The website and the other materials produced so far are proving useful tools for building new initiatives at the local level and involving other organizations involved in various ways in the integration of disadvantaged people and in adult education.

Each partner in its local and regional territory has used its own channels to form a STAKEHOLDER NETWORK, to be involved in the project to spread the knowledge and products that the partnership.

The subjects involved in these networks are:
- Adult students most at risk of "marginalization", including migrants and the unemployed;
- Public institutions responsible for promoting active participation and applying targeted policies integration;
- associations and volunteers acting in the integration sector;
- professionals and / or volunteers who work in support of migrants and the unemployed;
- social workers, psychologists and human resources managers;
- organizations interested in developing international cooperation projects and / or activities.

In each Pase the impact of this action is positive in terms of involvement and interest of these subjects for Digital Inclusion activities, as shown by new initiatives that in some countries have been undertaken by the partners involved, in collaboration with public / private subjects of the territory that carry out actions for the integration and education of adults (eg new projects applied under Erasmus Plus, digital education activities for migrants, use of innovative approaches in adult education by schools / centers of training).

The final products of the project - the information brochure, the preliminary research, the collection of good practices and the booklet - are available in English and in all partner languages on the website www.digitalinclusionproject.com/
